

Sunscreen Policy & Procedure

Policy

Team members will apply sunscreen on children ages 6 months and older from April through September with parent permission. Team members will apply sunscreen if it is partly cloudy or clear skies/direct sun, unless parent specifies that they want it applied at all times when going outdoors. Parents must provide their own sunscreen.

Procedure

1. All parents must give permission via the Topical Medication Permission Form to begin use of applying sunscreen.
2. If a parent does not want their child to wear sunscreen, they must sign the Sunscreen Refusal Form.
3. Team members must label all sunscreen from home with the child's first and last name.
4. Team members must apply sunscreen to all children with permission regardless of the child's ability to apply sunscreen themselves before AM and PM outside times.
5. Team members are encouraged to wear gloves when applying sunscreen and change their gloves between each child.
